

NOTICE OF PROPOSED ACTION

NOTICE IS HEREBY GIVEN that on March 2, 2021, the Clark County Department of Environment and Sustainability's Division of Air Quality (DAQ) received an application from **Las Vegas Paving Corporation – Portable #4 (Source 18091)** for a new portable crushing and screening plant, consisting of various crushers, screens, stackers, conveyors, etc. These emission units that comprise the portable crushing and screening plant will be operating in various locations throughout Clark County. The Control Officer has made a preliminary determination that the application complies with all Clark County Air Quality Regulations, all Nevada Revised Statutes Chapter 445B requirements, and the Clean Air Act (42 USC § 7401, et seq.), and should be approved.

NOTICE IS FURTHER GIVEN that any person may submit written comments on the application and any relevant documents to DAQ during a 30-day public comment period that starts Wednesday, June 9, 2021, and ends Thursday, July 8, 2021. Any written comments must be received by DAQ at its offices at 4701 W. Russell Road, Suite 200, Las Vegas, Nevada 89118 by Thursday, July 8, 2021, at 5:30 PM. Any person may request a public hearing during the public comment period, as provided in AQR Section 12.1.5.3(b), by filing a written petition with the Control Officer containing the petitioner's name, address, daytime telephone number, email address, and reason for requesting a hearing. Comments may be submitted electronically to AQPermitting@ClarkCountyNV.gov. The Control Officer shall consider all written comments, all oral comments if a public hearing is held, and all other documents on the administrative record before taking final action on the permit.

Under the applicable rules, Las Vegas Paving Corporation – Portable #4 is considered a synthetic minor source of PM₁₀ and a minor source of all other regulated air pollutants, enforced by the Division of Air Quality. The source has the following potential to emit (PTE) in tons per year:

PM₁₀ = 26.10; PM_{2.5} = 4.62; NO_x = 15.69; CO = 2.94; SO₂ = 0.04; VOC = 1.10

The draft permit, technical support document (with determinations of any reasonably available control technology), application (with supplements), and relevant materials available to the Control Officer are part of the administrative record and open for public inspection at DAQ's offices at the address above; by calling (702) 455-5942 Monday–Thursday, 7:30 AM–5:30 PM; and on the DAQ website at https://www.clarkcountynv.gov/government/departments/environment_and_sustainability/division_of_air_quality/permitting/public_notices.php. Copies may be obtained by contacting Silvia Gonzalez at DAQ's address above or calling (702) 455-8007.

Published on the 8th day of June, 2021.

Theodore A. Lendis, Permitting Manager
